Beginner Guide: How Stacking Works

HOW TO USE THIS PAGE

Read this page first. Programs and policies change, so always check each store's current coupon policy.

1. Store sale price

Start with the store's weekly ad or app. A sale on something you already buy is the foundation.

2. Store coupon

Many stores offer digital coupons in their app. Clip them to your loyalty account before checkout.

3. Manufacturer coupon

Manufacturer coupons come from the brand. Some stores allow one store and one manufacturer coupon per item, so check the store's current coupon policy.

4. Cash back or receipt rewards

After buying, some apps offer cash back or points for eligible items. Offers change often, so confirm before shopping.

5. Loyalty programs

Store loyalty programs may add points, fuel rewards, or member pricing.

Keep it honest

A deal only saves money if you needed the item. Savings vary by store, location, and week, and no result is guaranteed.
